- Integration of CAD software in different engineering fields (Topography, GIS, Road Design, Structural Analysis, Geotechnical Analysis...)
- Plugins development in CAD software to satisfy several engineer design needs
- Training of engineering teams on several CAD/GIS softwares

2010

2009

Data Engineer, AFRICAVER EPE SPA, Groupe ENAVA, Internship.
- Design of a data warehouse for decision support in production management for glass manufacturing plant.

2005

Web Developer, ITComp, Internship.
- Design, development and Integration of a semantic search engine to Plone/Zope CMS – (HTML/CSS, Python, MySQL)

🔤 Languages

English: Writing & Reading: Good, Speaking: Medium	**French:** Professional	**Arabic:** Native

🎓 Presentation

Driven by my passion for computers since childhood, I professionally specialized in this field starting with a successful educational path. As soon as I got my diploma, I started my professional career and successfully chained the tasks and projects in which I participated, to the satisfaction of clients and employers, which reinforces my love for my passion and pushes me to more successes.

🧩 Personnel's Competences

- Energetic, self-directed, and self-motivated; able to build and sustain long-term relationships with business and colleagues.
- Ability to solve problems with a keen eye for details; a strong desire to learn and contribute solutions and ideas to the team.
- Can manage multiple tasks and use judgment to prioritize and escalate to achieve desired outcomes.
- Strong verbal and written communication skills. Ability to adapt one's communication to the audience.
